CURRICULUM EXPLORATION

The **SD58 Adolescent Learning Network (ALN)** is a professional working group that will meet regularly to explore theoretical and practical needs of adolescents in our district. Ultimately, we will support each other to best meet the needs of the learners in our care and bring practical, successful strategies back to classrooms. We will explore Indigenous perspectives in the classroom, the Core and Curricular Competencies, and Assessment.

The focus of the group is for educators who work with grades 5-9 students (although all are welcome as multiple views lead to greater understanding and everyone has something to contribute).

Big Picture:

- How do we meet the needs of adolescent learners?
- How can we support educators who work with this age?

Focus:

- Indigenous perspectives – An exploration of our understanding of Indigenous perspectives with the intention of making Indigenous world views a part of our practice.
- Appreciative Inquiry of competency based learning - Engaging Youth in their learning.
 - o Core competencies
 - o Curricular competencies
 - o How they work together

Join us October 17 - RSVP
