

Games that can be used for a variety of skills:

Name of Game: Roll and Move

Targeted Skill: Letter Naming, Letter/Sound Correspondence, Sight Words

Anticipated Outcome: Students will be able to accurately name target letters of the alphabet OR accurately produce the sound of target letters OR accurately read target sight words

Grade Level: Kindergarten, Grade 1, Grade 2

Resources Required: Roll and Move game board, printable die template, marker, 6 games pieces for each game board

Explanation to Teacher (game construction): Print out a game board for each student (if possible, laminate for durability). Print out a die template (on cardstock and if possible, laminate for durability), fold and glue or tape sides closed. Print 6 target letters or words, one on each side of the die. Also, print the 6 target letters or words one in each of the coloured shapes at the bottom of each game board.

Explanation To Teacher (how game works): Students will take turns rolling the die and naming the letter (or producing it's sounds or reading the word). If correct, the student moves the game piece for that letter/word up one space on the game board. The game continues until one game piece reaches the top of the game board. That is the winning letter/sound/word.

Directions to Children: You are going to be playing a game that helps you to practice the letters/letter sounds for/ words __, __, __, __, __, __. You will take turns to roll the dice. If you can say the name of the letter/say the sound of the letter/read the word that is on the top of the dice then you get to move that letter/word's game piece up one place on the game board. The game stops when one game piece makes it to the top of the game board.
